

## Klixon® | 1NT SERIES FIXED TEMPERATURE THERMOSTATS

**WORLD CLASS PERFORMANCE**

The 1NT has been designed to be applied for use in many HVAC and appliance products as either a regulating or over-temperature safety switch.

The 1NT uses Klixon® technology and is available in several mounting options. Sensata Technologies has been a leading global supplier of pressure sensors and switches for over 50 years.

**Key Features**

- ISO9001: 2000 certification
- Factory inspected for continuity and contact resistance
- Global sales and technical support
- Ambient temperature rating from -40°C to 240°C (-40°F to 464°F)
- 1NT base provides:
  - Low cost
  - High temperature capability
  - Clean processing
  - High impact strength
  - Low static generation
- Bi-metal disc is factory pre-set to achieve:
  - Operation at requested temperatures
  - Tamperproof settings

- Product innovations include:
  - Solid metal-to-metal terminal construction
  - Current free spring
  - One piece transfer mechanism
- Switch actions:
  - Automatic reset: Available with both normally open and normally closed switch logic
  - Manual reset: Mechanical reset device
  - Trip free manual reset: UL M2 class rating that resists consumer tampering
  - One shot: meets agency requirements for single operation device

**Applications**

- Microwave ovens
- Sandwich makers
- Rice cookers
- Hair dryers
- Fan heaters
- Vacuum cleaners
- Gas / electric furnaces
- Espresso machines
- Tea makers
- Automotive / truck

**Available Constructions**

**High Profile Construction**

Options shown: 90° - 1/4" Q.C. terminals with Surface mount flange

**Part Types by Construction**

- 1NT01 Auto Reset / Silver Contacts
- 1NT11 Auto Reset / Gold Contacts
- 1NT09 One Shot: -35°C (-31°F) Reset
- 1NT10 One Shot: 0°C (32°F) Reset

**Low Profile Construction**

4 Post  
Options shown: 45° - 1/4" Q.C. terminals with 4 post and flat Al cup

- 1NT02 Auto Reset / Silver Contacts
- 1NT02TL Low Profile / One Shot
- 1NT20 Auto Reset / Gold Contacts

**Manual Reset Construction**

Options shown: Flat 1/4" Q.C. terminals with Airstream mount cup

- 1NT08 Manual Reset / Silver Contacts
- 1NT12 Manual Reset / Gold Contacts
- 1NT15 Trip Free MR / Silver Contacts
- 1NT19 Trip Free MR / Gold Contacts

**1NT Series Electrical Ratings**

The 1NT series of thermostats has been recognized by safety agencies, including UL, Canadian-UL and KEMA. Agency ratings are presented below as a general guide. However, the temperature settings, mechanical, electrical, thermal and environmental conditions of the specific application may differ significantly from agency test conditions. Therefore, the user must not rely solely on the agency ratings presented here, but must perform its own testing

**UL and C-UL**

Type	Max. Temp.		Cycles (X 1000)	Electrical Rating	
	°C	°F		120 Vac	0 - 9 amps 10 - 17 amps*

\* UL rated at these current levels at specific open/close temperatures. When applying to these electrical levels, nominal open/close temperatures must be considered to determine if the thermostat selected will operate as intended in the user's application. Please consult a Sensata Engineer for additional clarification.  
\*\* "E" means exposed disc.

Important Notice

Users are solely responsible for design application and function of the end use product. Users must evaluate the suitability of these devices to their application with respect to temperature settings, mechanical cycle life, electrical loading and environmental conditions. These devices are not environmentally sealed and have exposed electrical components. They are not intended for use in applications where exposure to condensed or dripping liquids, immersion in liquid, or exposure to other environmental contaminants may occur. In such cases, use of environmentally sealed devices such as the 3NT is recommended. Excessive mechanical cycling, high electrical loading or exposure to liquids or environmental contaminants as noted above can compromise electrical insulating properties of the device. Such conditions may result in insulation breakdown and accompanying localized electrical heating. The device may remain permanently closed or open as a result of these conditions, as well as at normal end-of-life.

Sample Order Placement

To enable Sensata Technologies to serve you in a quicker, more efficient manner, please be prepared to provide the following information when requesting samples:

1. Detailed application description
2. Estimated yearly usage.
3. Opening and closing temperatures
4. Max. temperature tolerances allowable
5. Switch type
6. Mounting style desired
7. Terminal orientation and material
8. Electrical load

Other conditions which are likely to affect the 1NT operation should also be described. These include:

1. Maximum temperature exposure
2. Location with respect to heat source
3. Temperature transfer medium (air, metal surface, etc)
4. Possible contamination sources (lint, chemical fumes, liquid, condensation, humidity, etc.)

When ordering thermocouple samples, specify whether J, K, or T type and the lead length desired. Standard wire size is 30 Ga..

Thermostat Handling Tips

1. Exposed disc devices should be kept free of dust and particulates, liquid and condensation. The face of the disc should never be snapped.
2. Mounting screws and drivers for use with smaller integral cups and flanges should be sized to provide adequate clearance to the thermostat body.
3. The installation force applied to the cup face should not exceed 66.7N (15 lbs.)
4. The maximum reset force on the manual reset and trip free button is 22.2N (5 lbs.).
